Professional Summary

Computer Science undergraduate with hands-on experience developing scalable backend systems using Spring Boot and ASP.NET Core. Experienced in RESTful API development, microservices architecture, Docker containerization, database optimization, and cloud deployments on AWS and Azure. Strong foundation in JWT-based authentication, CI/CD automation, and secure API design. Seeking an Associate Software Engineer role to contribute to high-performance, cloud-native applications.

Education

University of Colombo, School of Computing, BSc in Computer Science 2023 - 2026

Work Experience

Protonest IoT (Pvt) Ltd, Software Engineering Intern Oct 2025 - Present

- Developed and maintained 70+ RESTful APIs supporting real-time lock activation and IoT device management, reducing system response latency by 30%.
- Architected scalable backend modules following cloud-native microservices architecture principles, implementing API versioning, JWT-based authentication, and role-based authorization.
- Containerized services using Docker and deployed to AWS ECS Fargate with CI/CD pipelines.
- Designed centralized exception handling middleware and implemented structured logging using Log4j for standardized error management and production monitoring.
- Managed PostgreSQL (AWS RDS) databases with optimized queries and indexing strategies to enhance performance and scalability.
- Implemented WebSocket for real-time updates and MQTT for secure IoT communication.
- Documented APIs using OpenAPI/Swagger and wrote unit tests with JUnit to ensure reliability and maintainability.
- Collaborated in Agile teams and supported live production systems, ensuring high availability.

Projects

Parking Management System | ASP.NET Core Web API, Angular, JWT 2026

- Engineered a full-stack Parking Management System to handle vehicle entry and exit operations.
- Developed RESTful APIs using layered architecture (Controller–Service–Repository pattern).
- Structured a normalized PostgreSQL database schema for vehicle logs and transaction history.
- Integrated the Angular front-end with backend APIs using HTTPClient for seamless client–server communication.

Key Concepts: .NET Core, Angular, REST APIs

- GitHub - [github.com/ParkingManagementSystem/](https://github.com/daninithi/ParkingManagementSystem/)

Alphintra | Next.js, Spring Boot, Tailwind, Docker, PostgreSQL 2025

- Designed and implemented microservices for real-time market data processing and trade execution.
- Integrated third-party trading APIs with testnet support for safe strategy validation.
- Orchestrated Docker-based containerization and automated build pipelines through CI/CD integration.
- Implemented unit testing for service-layer validation.

Key Concepts: Microservices, API Integration, Cloud Deployment, CI/CD, Docker

- GitHub - [github.com/Alphintra/](https://github.com/daninithi/Alphintra/)

- Built a full-stack web application featuring authentication and role-based access control.
- Created RESTful APIs for book management and borrowing workflows.
- Applied modular front-end components using React.
- Enhanced MongoDB queries to improve data retrieval efficiency.

Key Concepts: Full-Stack Development, Authentication, REST APIs, Database Optimization

- GitHub - github.com/Libo/

Technical Skills

Programming Languages: JavaScript (ES6+), TypeScript, SQL, Python

Front-End: React, Angular, Next.js, HTML5, CSS3, Tailwind CSS

Back-End: Spring Boot, ASP.NET Core Web API, Node.js, RESTful APIs, JWT Authentication

Databases: MySQL, PostgreSQL, MongoDB

Cloud & DevOps: AWS (ECS, RDS, ECR), Microsoft Azure, Docker, GitHub Actions, CI/CD Pipelines

Architecture & Concepts: Microservices Architecture, MVC, Client-Server Architecture, API Security, Role-Based Access Control

Messaging & Real-time: WebSocket, MQTT

Developer Tools: GitHub, Docker, VS Code, Eclipse, Postman

Certifications

- LinkedIn - Spring Boot 3 Essential Training
- LinkedIn - AWS Essential Training for Developers
- HackerRank - SQL (Basic)
- HackerRank - Problem Solving (Basic)

Leadership & Activities

- SLIOT Challenge Semifinalist (Open Category) – University of Moratuwa
- IEEE WIE Member – UCSC
- ISACA Student Group – UCSC
- Basketball (Zonal, Provincial Level)
